ReactJS Developer

ABOUT ME:

- Reliable and flexible team player with communication and offering expertise in web development. Organized, always eager to learn, and want to contribute my knowledge for the well-being of society.
- I am a hardcore and 4 year of experience in web applications with ReactJs. The projects are based on ReactJS with various development technologies like Redux, React Bootstrap, React Strap, and Material UI etc.
- Proficient in code versioning tools such as GIT and project management tool like Github, Bitbucket, trello, notion and jira etc.
- Logical thinking. A keen eye for design and attention to detail.

Name: Rahul Lunagariya

Title	**Years of Experience**
ReactJS developer	4+ Years

SUMMARY

Skilled software professional and having more than 4 years of software development experience in Web based multi-Tier applications and good knowledge on SDLC process. Particularly interested in Reactjs, redux, cypress testing tool, javaScript, HTML, CSS. I am also expertise in integrate rest API, complex & real-time application.

Ability to perform and deliver in technically complex projects, meet deadlines and adaptable to ever changing priorities.

SKILLS

Front End Languages:	**Frameworks:**
HTML, CSS, JavaScript, jQuery, Bootstrap	ReactJs, MaterialUI, React Strap, React Bootstrap, cypress testing tool

PREFERRED ENVIRONMENT

Windows, Mac, ubuntu, Git, Github, Bitbucket

THE MOST AMAZING…

I have developed static, dynamic and real-time projects using reactJS with materialUI, react strap, react bootstrap, JavaScript, HTML, CSS, firebase, graphQL.

Projects	**ReactJS Developer** March.2020 – Till date

ReactJS Developer March.2020 – Till date

Project Name: Food Discovery
URL: https://feature-single-item-page.d2k9spd8qml92a.amplifyapp.com/ohio
https://develop.d1tzf8u5zazlj1.amplifyapp.com

Discover delicious local food made by local Restaurants and tailored to your taste. Order from your favorite delivery apps or call to order for pickup. FoodDiscovery App features an innovative algorithm that organizes dishes made by local Restaurants based on users previous interactions with the app. Users are presented with dishes in form of a stack of cards where each card represents a dish. Users interact with each card by liking it by swiping right or skipping it by swiping left. Every time a user interacts with a card our system learns what the user prefers on that day and presents new cards accordingly. Users can share dishes they discover with friends as well as add reviews to dishes.

Roles and responsibilities:

- Analyzing the requirements received from the client.
- Working on impact analysis and coding.
- Solving Production bugs at the desired time with quick feasible solution.
- Working with maintaining CI/CD pipeline.
- API integration offering all CRUD operations with GraphQL/Apollo Client.

Technologies:

ReactJS, MaterialUI, Redux, Redux thunk, context API, GraphQL/Apollo Client	ReactJS	GraphQL	MAC OS

React JS Developer 2019 –March 2021

Project Name: Apronstaff
URL: https://apronstaff.com/
Restaurants, hotels, resorts, cruises, and a variety of hospitality businesses are here to find the employees who will help them rebuild their companies. Apronstaff provides them state of the art tools to post jobs and shortlist applicants. It's developed using ReactJs, React Bootstrap and firebase.

Roles and responsibilities:

- Working with ReactJs and firebase oAuth authentication.
- Working with make responsive design.
- API Integration offering all CRUD operations with firebase API.
- Working with integration firebase analytics in all pages.
- Fixing live defects and performing code reviews.

Technologies:

ReactJS, react bootstrap, javascriptwebRTC and firebase	ReactJS, Redux, Redux thunk, Firebase, Bootstrap, CSS, HTML5

ReactJS Developer 2018 – April 2020

Project Name: StartMall

Buy daily grocery, household essentials and Cosmetic products online from startmall. Select a time slot for delivery and your order will be delivered right to your doorstep.Quality You Can Trust. Contact Less Delivery. Lowest Prices.

Roles and responsibilities:

- Analyzing the requirements received from the client.
- Working on impact analysis and coding.
- Solving Production bugs at the desired time with quick feasible solution.
- Working with maintaining CI/CD pipeline.
- API integration offering all CRUD operations with Firebase and Firebase functions.

Technologies:

ReactJS, React Bootstrap, Redux, Redux thunk, context API,Firebase , Firebase function	ReactJS	Firebase	MAC OS

Additional Experiences

I mainly worked as a front end developer, creating static and dynamic website with html and animation with reactJS. I also have experience in Real-time and complex projects, Micro-Services Projects, Payment Integration,

Education

BCA - Bachelor's in computer application(2015-2018)
Veer Narmad South Gujarat University– Gujarat, India

MCA - Master in computer application(2018-2020)
Gujarat Vidyapith – Gujarat, India
